Fiona Sweeney

Lead Product Designer

My Portfolio
fionasweeney90@gmail.com

Lead Product Designer with 12+ years in digital design, specialising in shared customer experiences across multiple brands. Promoted at Flutter from Senior UX Designer at PokerStars, I now lead cross-brand work on search, navigation and reusable UX patterns across Paddy Power, Betfair and Sky Vegas, partnering with Design Systems, Product and Engineering to deliver consistency at scale across app and web. Experience in e-commerce, payments and regulated gaming, with a research- and data-led approach end to end.

EXPERIENCE

Flutter UK&I Gaming — Lead Product Designer

December 2025 — Present Dublin, Ireland

Lead design for shared customer experiences across Paddy Power, Betfair and Sky Vegas on app and web, setting UX direction for cross-brand journeys from discovery and problem definition through to delivery.

- Bring Product, Engineering, Data, Content and Commercial together early, keeping customer experience a priority across gaming, promotions and cross-product journeys.
- Align design leads and teams across three brands on shared UX patterns and principles, balancing platform-wide consistency with brand-specific needs.
- Partner with the Design System team to connect strategic UX patterns with reusable, accessible UI components, contributing new patterns as needs emerge.
- Run design critiques and mentor Product Designers on craft and career development.
- Facilitate cross-functional discovery workshops, using research, analytics, behavioural data and A/B testing to shape product decisions and bring design in earlier.

Search & Discovery
Leading the cross-brand search redesign across Paddy Power, Betfair and Sky Vegas. Used analytics showing only 56% of searches led to a game launch to set a fundamentals-first direction (speed, accuracy, consistency) and define shared patterns aligned to the design system.

Promotions & Rewards
Leading end-to-end design for a complex promotional experience for Sky Vegas, aligning seven teams, from Product and Engineering to Compliance, around one customer journey.

PokerStars (Flutter) — Senior UX Designer

February 2023 — November 2025 Dublin, Ireland

Led design for Payments, Accounts, Safer Gambling and Marketing in a regulated global product, owning deposits, withdrawals, transaction history and payment-method management.

- Led the Payments and Marketing design teams, setting design direction, delegating work and maintaining design quality.
- Mentored designers across Payments and Marketing through critique, pairing and career conversations, helping them grow in craft and confidence.
- Partnered closely with Product, Engineering and Compliance to translate complex regulatory and technical requirements into clear customer experiences.
- Designed payment verification journeys across multiple markets, balancing regional regulatory requirements with a clear, low-friction customer experience.
- Used research, usability testing, analytics and experimentation to find and remove friction in key payment journeys, turning customer pain points into prioritised improvements.

- Figma
- Miro
- UserTesting
- Google Analytics
- Claude
- ChatGPT

EXPERIENCE (CONT)

PokerStars (cont.)

Deposits & Withdrawals
Designed and improved regulated deposit and withdrawal journeys across multiple payment methods and markets, balancing customer, technical and compliance requirements.

Transaction History
Redesigned the information architecture, navigation and filtering of transaction history across regulated markets including the EU, Italy and Romania, so customers could quickly find and understand their account activity.

Payment Method Management
Provided design direction for the redesign of payment-method management (pre-launch), shaping journeys, interaction patterns and the overall customer experience.

The Irish Store & GiftsDirect UX & Digital Designer

July 2017 — July 2022 Dublin, Ireland

Led UX and visual design across two global e-commerce brands, The Irish Store and GiftsDirect, owning the shopping experience across web and mobile.

- Redesigned the checkout payment step following a site-wide UX audit and a survey of more than 2,000 customers, increasing conversion by over 15%, reducing checkout abandonment by 11.8% and cutting customer service queries by over 10%.
- Audited navigation, product findability, product pages and checkout, prioritised quick wins with stakeholders, and A/B tested new search results layouts.
- Created shared templates and components to keep both brands consistent across site, email and campaigns, including a modular, responsive email system that lifted 12-month retention by 5% and lead conversion by 4.2%.

EARLIER ROLES (2013–2017)
